**NEO-OXY 10/10®**

**PRODUCT DESCRIPTION**
Pharmgate’s Neo-Oxy 10/10® is a combination of two proven broad spectrum antibiotics - Neomycin and Oxytetracycline. Neomycin is a proven antibiotic against bacterial enteritis, concentrating its anti-infective action in the gastrointestinal tract. Neomycin is highly effective against certain gram-negative bacteria, including E. Coli and Salmonella. It is also effective against certain gram-positive bacteria. The other antibiotic, Oxytetracycline, is highly effective in controlling complex diseases, such as CRD, in chickens and shipping fever in cattle. Oxytetracycline combats disease-producing organisms in both the blood and gastrointestinal tract and is highly effective against gram-negative and gram-positive bacteria. Neo-Oxy 10/10® provides a winning combination of broad spectrum antibiotics for approved livestock species when used according to label directions.

**PRODUCT ADVANTAGES**
- Broad spectrum antibiotic activity. Oxytetracycline (partially absorbed from the gastrointestinal tract into the blood stream) along with Neomycin (which remains essentially in the gastrointestinal tract) make for an ideal combination.
- Low cost per treatment compared to other antibiotic combinations.
- Blends and flows easily in feeds.
- Manufactured and quality-controlled at Pharmgate’s manufacturing facility according to FDA cGMP requirements.
- Color-coded bag for easy identification.

**BENEFITS**
- **Swine and Pigs**
  1. Excellent starter program.
  2. For treating bacterial pneumonia.
  3. For treatment of bacterial enteritis in pigs.
- **Calves, Beef Cattle and Nonlactating Dairy Cattle**
  1. For preventing and treating bacterial-enteritis (scours).
- **Poultry (Chickens and Turkeys)**
  1. Broad disease protection available for poultry.
  2. Excellent starter program.

**CLEARANCES**
Neo-Oxy 10/10® is classified as a Type B Medicated Category II drug product. A FDA Medicated Feed Mill License is not required for Neo-Oxy 10/10® when mixed in finished feeds.

**SPECIES APPROVED**
Poultry (Chickens and Turkeys), Swine, Sheep, Calves, Beef Cattle and Nonlactating Dairy Cattle.

**PRODUCT DESCRIPTION**
**Active Drug Ingredients** - Oxytetracycline (dihydrate) equivalent to 10 grams Oxytetracycline HCl and 10 grams Neomycin sulfate per pound.

**Ingredients** - Oxytetracycline, neomycin sulfate, calcium carbonate, roughage products, mineral oil.

**Appearance** - Tan powder meal

**Bulk Density** - Approximately 42 lb./cu. ft.

**Packaging** - Neo-Oxy 10/10® is available in 50 pound bags. Bags are yellow color-coded in gusset area.

*Take time to observe label directions.*

### CALVES, BEEF CATTLE, AND NON-LACTATING DAIRY CATTLE

**For Calves (up to 250 lb) for increased rate of weight gain and improved feed efficiency.**

**Residue Warning:** Zero-day withdrawal. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

**For calves (250-400 lb) for increased rate of weight gain and improved feed efficiency.**

**Residue Warning:** Zero-day withdrawal. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

**For growing cattle (over 400 lb) for increased rate of weight gain, improved feed efficiency, and reduction of liver condemnation due to liver abscesses.**

**Residue Warning:** Zero-day withdrawal. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

### TURKEYS

**For growing turkeys for increased rate of weight gain and improved feed efficiency.**

**Residue Warning:** Zero-day withdrawal. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

### SWINE

**For increased rate of weight gain and improved feed efficiency.**

**Residue Warning:** Zero-day withdrawal. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

### SWINE

**For increased rate of weight gain and improved feed efficiency.**

**Residue Warning:** Zero-day withdrawal. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

### SHEEP

**For increased rate of weight gain and improved feed efficiency.**

**Residue Warning:** Zero-day withdrawal. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

### For breeding swine for control and treatment of ketopenis (reducing the incidence of abortion and shedding of ketopenis) caused by Lactobacillus casei susceptible to oxytetracycline.

**Residue Warning:** Withdraw 5 days before slaughter at 10 mg/kg dosage.

### Restricted Drug: (California) – Use only as directed. Not for human use.
